

DREW

Learn By Doing

RISE Program

The Charles A. Dana Research Institute for Scientists Emeriti (RISE) at Drew offers undergraduates a unique opportunity to engage in research under the supervision of retired industrial scientists.

Under the mission of the Institute, retired scientists receive offices, research space, and equipment at Drew in exchange for directing the research of undergraduate students. Fellows discuss with students the issues and possibilities of careers in industrial employment and help create bridges between Drew and industry.

Students engage in research with top scientists including Nobel Prize winner, William C. Campbell, a RISE fellow for over 20 years.

United Nations Semester

Spend time on the ground floor of geopolitics. Interview diplomats, learn about the inner workings of the UN and discuss issues shaping the international community on a daily basis. You won't just see the world turn; you'll learn how it happens.

Wall Street Semester

Goldman Sachs. New York Stock Exchange. Morgan Stanley. These organizations play a major role in shaping the world's economy, and Drew takes you to meet them at the center of global finance.

Find mentors, including Drew alumni, among the traders, regulators, fund managers and decision-makers that power the financial world. You will take a critical look at Wall Street operations, learn the economics behind the transactions, explore the district's history, and discuss ethical/moral issues facing the market.

At the end of the semester you will have a deeper understanding of the role of financial markets within the rest of the economy.

Semester on Communication and Media

Broadcasting, advertising, publishing, film, public relations – New York City is the media and communications capital of the world. Drew takes you into the heart of it all to learn from professionals who shape our interconnected, communications-based world.

Semester on Contemporary Art

One day, you're sitting in an up-and-coming artist's Brooklyn studio, discussing how nature inspires you. The next, you're at the Metropolitan Museum of Art, debating the political meaning of a Kadinsky work with a classmate.

Located in the global capital for creativity, this program examines all the important issues surrounding contemporary art.

Internship Opportunities

Drew's Center for Internships and Career Development help students take advantage of Drew's proximity to New York City through internships at prestigious companies like:

- United Nations
- Metropolitan Museum of Art
- Wells Fargo
- Barclays Capital
- Morgan Stanley
- US Securities and Exchange Commission
